**Attention: Mr André Steyn**

Dear Sir

**'iFleet Fuel Catalyst'**

Scania has carried out tests which did result in a saving of between 4% and 7% of fuel consumption over a six month period, however, claims of reducing the emissions were never concluded.

Scania neither approves nor disapproves any product not manufactured or sold by Scania. The use of these products are at the discretion of the end-user and any problem attributed to these products or as a result of these products would not be recognized as a Scania responsibility.

The Scania warranty covers defects in workmanship and material as manufactured and sold by Scania, therefore, adding or attaching products sold in the market place does not affect our warranty. However, any vehicle performance problem or failure caused by products not manufactured or sold by Scania will not be considered warrantable by Scania.

Any costs incurred to repair a vehicle under warranty or maintenance contract arising from the failure or malfunction of the additive, iFleet Fuel Catalyst, will not be the responsibility of Scania and will be charged to the customer.

Yours faithfully

  
**ALEC MACK**  
Services Director
